Armed Forces Logistics Organisation – Medical Services
Centre of Competence for Military and Disaster Medicine

Geschätzte Kolleginnen und Kollegen

Es ist uns eine grosse Freude, Sie zum Fachdienstkurs Militär- und Katastrophenmedizin (FDK 3 MKM), 2025 in Thun begrüßen zu dürfen. Das Programm ist vollgepackt mit aktueller Wissenschaft und praxisorientierten Themen zur Militär- und Katastrophenmedizin. Gemeinsam mit dem Kongresskomitee haben wir ein attraktives wissenschaftliches Programm zusammengestellt. Die Militär- und Katastrophenmedizin bringt ständig neue Erkenntnisse hervor, die unsere tägliche Arbeit und die Einsatzplanung in der Praxis wesentlich beeinflussen.

Der viertägige FDK MKM und der Rap Ofaz vermitteln Strategien und praktische Fertigkeiten, um als Militärärztin oder Militärarzt traumatologische und polymorbide Patienten in Konflikt-, Krisen- und Katastrophensituationen kompetent zu versorgen. Kriegsmedizinische und -chirurgische Themen werden aus verschiedenen medizinischen Blickwinkeln beleuchtet. Im Kurs lernen Sie alltagstaugliche und praktikable Entscheidungshilfen kennen, um Ihre Handlungssicherheit in kritischen Situationen zu steigern. Sie lernen, in ungewohnten und unübersichtlichen Situationen mit überforderten Ressourcen Entscheidungen zu treffen und gewohnte individualmedizinische Vorgehensweisen zu verlassen.

Die Frage nach der verantwortungsvollen Führung von Führungskräften in Zeiten komplexer Herausforderungen, ethisch-moralischer Dilemmata und Möglichkeiten der Resilienz werden ebenfalls im Kurs behandelt.

Ein reger wissenschaftlicher und fachlicher Informationsaustausch im Bereich MKM mit Fachexperten wird ermöglicht und gefördert. Darüber hinaus bietet diese Woche die Möglichkeit, ein attraktives Netzwerk aufzubauen und eine interdisziplinäre kollegiale Kommunikationskultur zu pflegen.

Nutzen Sie diese tolle Gelegenheit und „let's share knowledge“!

Ihr Team Kompetenzzentrum für Militär- und Katastrophenmedizin

Chères et chers collègues,

C'est pour nous une grande joie de pouvoir vous accueillir à Thoun pour le cours de spécialistes 3 en médecine militaire et de catastrophe (C spéc 3 MMC) 2025. Le programme est chargé de science actuelle et des sujets pratiques orientés vers la médecine militaire et de catastrophe. En collaboration avec le comité scientifique, nous avons élaboré un programme attrayant. La médecine militaire et de catastrophe produit constamment de nouvelles connaissances qui influencent considérablement notre travail quotidien et la planification des interventions dans la pratique.

Le C spéc 3 MMC, d'une durée de quatre jours, et le rapport du médecin chef de l'armée transmettent des stratégies et des aptitudes pratiques permettant aux médecins militaires de prendre en charge de manière compétente des patients traumatisés et polymorbides dans des situations de conflit, de crise et de catastrophe. Les thèmes de la médecine de guerre et de la chirurgie sont abordés sous différents angles médicaux. Dans le cours, vous apprendrez à connaître des outils de décision utilisables et praticables au quotidien afin d'augmenter votre sécurité d'action dans des situations critiques. Vous apprendrez à prendre des décisions dans des situations inhabituelles et confuses, avec des ressources dépassées, et à abandonner les procédures médicales individuelles habituelles.

La question de la gestion responsable des cadres en période de défis complexes, les dilemmes éthiques et moraux et les possibilités de résilience sont également abordés dans le cours.

Un échange actif d'informations scientifiques et professionnelles dans le domaine de la MMC avec des experts du domaine est rendu possible et encouragé. En outre, cette semaine offre la possibilité de construire un réseau attrayant et d'entretenir une culture de communication collégiale interdisciplinaire.

Profitez de cette formidable opportunité et «let's share knowledge»!

Votre équipe Centre de compétences pour la médecine militaire et la médecine de catastrophe
