Geschätzte Kolleginnen und Kollegen

Es ist uns eine grosse Freude, Sie zum Fachdienstkurs Militär- und Katastrophenmedizin (FDK 3 MKM), 2026 in Thun begrüssen zu dürfen. Das Programm des FDK 3 MKM ist geprägt von aktuellen wissenschaftlichen Erkenntnissen und praxisorientierten Themen, die auf die Stärkung der Verteidigungsfähigkeit und das Erreichen des Kriegsgenügens ausgerichtet sind. Die Militär- und Kriegsmedizin entwickelt sich kontinuierlich weiter. Neue Erkenntnisse beeinflussen unsere tägliche Arbeit sowie die medizinische Einsatzplanung wesentlich.

Der viertägige FDK 3 MKM vermittelt Strategien und praktische Fertigkeiten, um als Militärärztin oder Militärarzt die medizinische Einsatzbereitschaft für den Kriegseinsatz kompetent sicherzustellen und Verwundete unter einsatznahen Bedingungen fachgerecht zu versorgen. Kriegsmedizinische und -chirurgische Fragestellungen werden aus unterschiedlichen medizinischen Perspektiven beleuchtet. Ein weiterer Schwerpunkt liegt auf der verantwortungsvollen Führung von Mitarbeitenden und Führungskräften in Zeiten komplexer Herausforderungen. Ethisch-moralische Dilemmata sowie Möglichkeiten zur Förderung der persönlichen und organisatorischen Resilienz werden ebenfalls thematisiert.

Der FDK 3 MKM fördert den wissenschaftlichen und fachlichen Austausch mit Expertinnen und Experten aus dem Bereich der Militär- und Kriegsmedizin. Darüber hinaus bieten die Kurstage Gelegenheit, ein wertvolles berufliches Netzwerk aufzubauen, bestehende Kontakte zu vertiefen und eine interdisziplinäre, kollegiale Kommunikationskultur zu pflegen.

Nutzen Sie diese tolle Gelegenheit und „let's share knowledge“!

Ihr Team Kompetenzzentrum für Militär- und Katastrophenmedizin

---

Chères et chers collègues,

C'est pour nous une grande joie de pouvoir vous accueillir à Thoune pour le cours de spécialistes 3 en médecine militaire et de catastrophe (C spéc 3 MMC) 2026. Le programme du C spéc 3 MMC est axé sur les connaissances scientifiques les plus récentes et sur des thématiques pratiques visant à renforcer la capacité de défense et de suffisance au regard des exigences de la guerre. La médecine militaire et la médecine de guerre évoluent en permanence. Les nouvelles connaissances influencent considérablement notre travail quotidien ainsi que la planification des engagements médicaux.

Le C spéc 3 MMC, d'une durée de quatre jours, transmet des stratégies et des compétences pratiques permettant aux médecins militaires, d'assurer efficacement la préparation médicale vers la capacité d'intervention en cas de guerre et de prendre en charge les blessés de manière appropriée dans des conditions proches de celles du terrain. Les questions liées à la médecine et à la chirurgie de guerre sont abordées sous différents angles médicaux. Un autre axe majeur du cours porte sur la conduite responsable des collaborateurs et des cadres dans un contexte de défis complexes. Les dilemmes éthiques et moraux, ainsi que les moyens de renforcer la résilience individuelle et organisationnelle, sont également abordés.

Le C spéc 3 MMC encourage les échanges scientifiques et professionnels avec des expertes et experts du domaine de la médecine militaire et de la médecine de guerre. En outre, ces journées de formation offrent l'occasion de développer un réseau professionnel précieux, d'approfondir les contacts existants et de promouvoir une culture de communication interdisciplinaire fondée sur la collégialité.

Profitez de cette formidable opportunité et «let's share knowledge»!

Votre équipe Centre de compétences pour la médecine militaire et la médecine de catastrophe
